HEAT STRESS ESSENTIALS

Be Prepared for Heat-Related

OSHA launched an indoor and outdoor heat-related hazards enforcement program on April 8, 2022 to increase OSHA inspections in over 70 indoor and outdoor highrisk industries.

Heat Stress

Heat is the most dangerous weather condition

Extreme heat is more deadly than natural disasters. Heat stress injuries are preventable with the right preparation and best practices.

Skin Care Products

Sunburns, insect stings & poison ivy happen more frequently in the summer

Protect workers from common skin hazards in outdoor conditions with solutions that prevent discomfort and reduce potential health risks.

Skin Care

We offer sunscreen with SPF30.

Heat Illness Can Be Deadly

During hot weather, especially with high humidity, sweating isn't enough. Body temperature can rise to dangerous levels if you don't drink enough water and rest in the shade. You can suffer from heat exhaustion or heat stroke. Heat illnesses and deaths are preventable.

OSHA Employers Must Protect Workers from Excessive Heat Injuries

Under OSHA law, employers are responsible for providing workplaces free of known safety hazards. This includes protecting workers from extreme heat. Working in full sunlight can increase heat index values by 15 degrees Fahrenheit. Keep this in mind and plan additional precautions for working in these dangerous conditions.

1,000,000+

In the USA are Diagnosed with Skin Cancer Each Year

Approximately 85% of the general population will develop an allergy if exposed to poison oak, ivy or sumac.

*National Cancer Institute (NCI) *Occupational Safety and Health Administration (OSHA)
