

GROVES INDUSTRIAL METAL CUTTING SERVICES

Groves Industrial provides a tailored approach to enhance supply chain processes and production efficiency. Their expert team identifies improvement areas to ensure adaptable production lines. By integrating advanced technologies and strategies, they support sustainable growth and a competitive market edge. Key services include:

- **DoALL Sawing Specialists:** Optimize mechanical and CNC band sawing for service and function.
- **Coolant Specialists:** Ensure effective coolant performance for heat dissipation and fluid quality.
- **Cutting Tool Specialists:** Collaborate with manufacturers for tool evaluation and boosting productivity and profitability.

Why Manufacturers Choose Groves Industrial

Deep Technical Expertise: Our metalworking specialists don't just understand products, they understand processes. From machining and cutting to finishing and fabrication, we help you solve real production challenges with practical, measurable solutions.

Productivity-Driven Solutions: We analyze your workflow, identify bottlenecks, and recommend the right tooling, fluids, and process improvements to boost efficiency. Many customers see double-digit gains in tool life, cycle time reduction, and cost savings.

A Complete Metalworking Ecosystem: Groves Industrial brings together the industry's top brands in cutting tools, abrasives, coolants, safety, and MRO. One partner, one streamlined supply chain, zero headaches.

On-Site Support that Makes a Difference: Our specialists work directly with your operators and engineers to optimize setups, troubleshoot issues, and ensure your shop is running at its best.

METAL CUTTING SERVICES

EVALUATING SPECIAL TOOLS

Special tooling often involves long lead times and high costs, requiring significant stock for the lowest prices. Groves Industrial offers Zero-Point Fixturing and advanced 4 & 5 Axis rotary chucks, utilizing the latest CAM programming to reduce reliance on special tools and lower production costs. By partnering with a Certified Manufacturing Technologist/Machining Specialist from Groves, companies can minimize special tools and maintain efficient machine operation.

EQUIPMENT UTILIZATION

Are you considering adding more capital equipment and personnel to meet product demand? Groves can evaluate your current assets' utilization and recommend tailored solutions. With world-class Overall Equipment Efficiency (OEE) around 40-45%, consult Groves for an unbiased, professional action plan before budgeting for next year's CAPEX based on your company's growth forecast.
