

*Let us do the heavy lifting.*

Groves Industrial will bring a factory-trained Lift-All® representative to your site to perform sling inspections and/or safety seminars.

## Inspections

OSHA requires slings with any of these common problems to be taken out of service.

- ❗ Illegible tag (s)
- ❗ Edge or Surface cuts on web slings
- ❗ Stretched, worn, gouged or bent links on chain slings
- ❗ Kinked, broken, crushed or abraded wire slings

**Don't risk fines. Act now!**

## Inspections in 3 Easy Steps...

- 1** Each sling is individually recorded and reported by location, serial number (if available), size, type, reach and condition. We will affix warning tags to those slings found to be damaged, if desired.
- 2** A typewritten sling survey report will be submitted to you for your records, showing the above information, along with any recommendations we may have for improving your sling life and lifting safety.
- 3** If you wish to repair or replace any of the damaged slings, we will provide cost estimates to do so.

## Seminars

Lift-All offers a "Safety in Lifting" seminar. A Lift-All representative will come to your location and provide training to your employees.

### Safety in Lifting Topics

- ❗ Sling Categories
- ❗ Planning a safe lift
- ❗ Inspection procedures for slings
- ❗ Repair information
- ❗ Care and operating practices

Learn how to use the best slings for application, and how to extend sling life!

Lift-All Safety Services are available through Groves and are FREE to Lift-All customers.
